FOREWORD

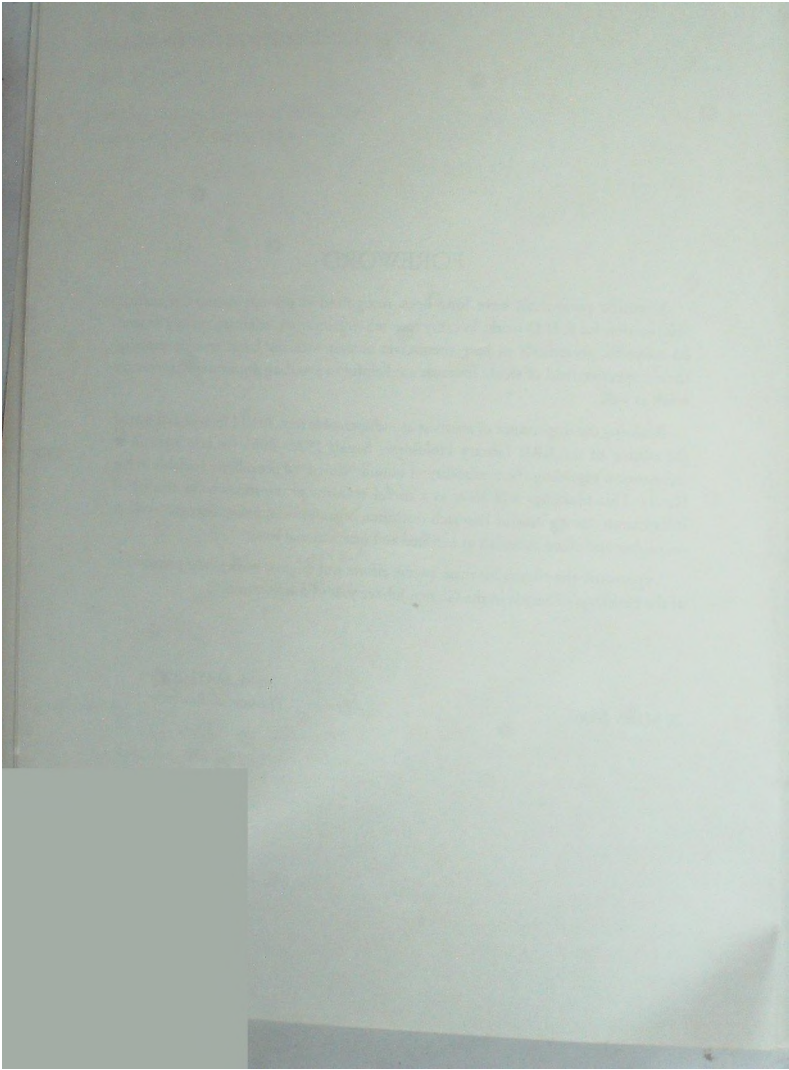

Scientific periodicals have long been recognized as primary sources of current information for R & D work. In every research organization, scientists mainly depend on scientific periodicals to keep themselves abreast with the latest developments in their respective field of work. Journals are helpful in avoiding duplication of research work as well.

Realising the importance of serials as an indispensable tool, RRII Library has initiated the editing of the **RRII Library Holdings: Serials 1922- 2005** for easy retrieval of information regarding the availability of bound volumes of periodicals available in the library. This Holdings will serve as a useful resource of information for sharing of information among various Research institutes, organizations, universities etc working on rubber and allied materials at national and international levels.

I appreciate the editors for their sincere efforts and diligent work in the preparation of the Holdings of Serials in the Golden Jubilee year of this institute.

20 March 2006

N. M. MATHEW
Director of Research

ABOUT THE COMPILATION

Periodicals are indispensable sources of information in the field of scientific and technological research. But proliferation of journals and other scientific publications, escalation of their price to prohibitive levels etc. stress the need for sharing of resources in a cost effective manner for easy and quick access to information. Historically, libraries facilitate easy access to information in the field of scientific and technological research. To make this facility more effective, library tools that provide bibliographic control should come out from specialized research libraries. **RRII Library Holdings: Serials (1922-2005)**, which is the revised edition of a similar compilation published during 1997, is an earnest effort towards this goal.

At present, RRII Library receives about 200 periodicals by subscription, exchange and gift. All the back volumes of the journals procured in the library since 1922 are bound and are available to users of the library. The **RRII Library Holdings: Serials** provides bibliographic details of bound volumes of periodicals available in the RRII Library. The periodicals up to 2005 have been included in this compilation.

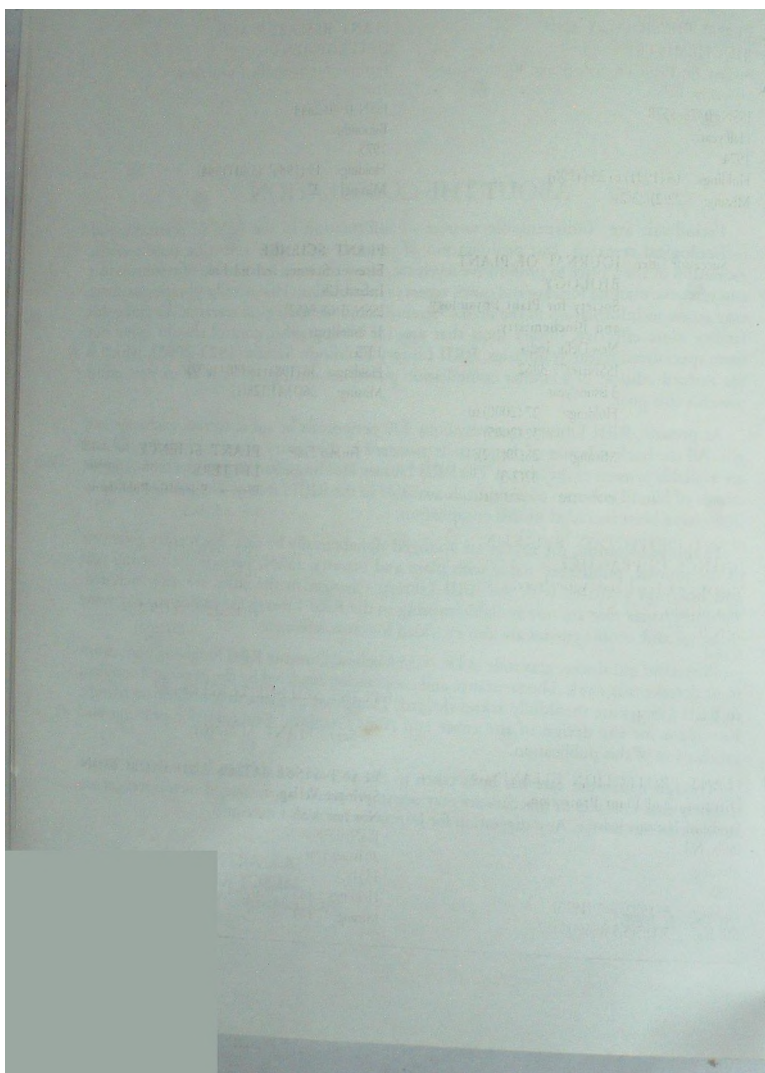

In this publication, the entries are arranged alphabetically by title. Each entry gives title of the journal, publishers' name with place and country, ISSN, periodicity, starting year and holdings available with the RRII Library. Changes in the titles are also included. Volumes/issues that are not available/missing in the RRII Library are indicated. For some titles, *see* and *see also* entries are also provided for cross reference.

We record our sincere gratitude to Dr. N.M Mathew, Director, RRII for giving permission to undertake this work. The assistance and cooperation rendered by the personnel attached to RRII Library are thankfully acknowledged. Thanks are also due to M/s Creative Minds, Kottayam for the design of the cover and Alois Graphics, Kottayam for printing and production of this publication.

Though maximum care has been taken in the preparation of this document, it is not unlikely that mistakes or inaccuracies may occur. We would appreciate, if such instances are brought to our notice. Any suggestion for improvement is also welcome.
